Entity Relationship Diagram

Please include your Entity Relationship Diagram here. Below is an example of an Entity Relationship Diagram.

Database Implementation

This section displays all the SQL statements used to implement the Entity Relationship Diagram.

Data Definition Language (DDL)

Please provide all the Data Definition Language (DDL) scripts used to create the tables that represent the Entity Relationship Diagram (ERD).

```

```

Data Manipulation Language (DML)

Kindly provide all the INSERT INTO statements used to populate data for each table in the database.
